Loctite® Integrated Semi-Automatic
Dual Channel Dispenser
0-7 bar (0-100) psi with Low Level Sensor
Part # 1390321
North American Engineering Center, September 2011

PRODUCT DESCRIPTION

The Loctite® Integrated Semi-Automatic Dispenser combines a dual channel dispense controller and reservoir into a single system. The controller provides 2 independent digital timing channels that provide control of 2 pneumatic outputs. These outputs can be used to control dispense valves, advancing slides or any other pneumatic device. The controller can be actuated either by a footswitch, fingerswitch or external signal. It is capable of operating in a manual or timed mode for dot or bead dispensing applications. The reservoir can accommodate 50ml, 250 ml, 500 gram, 1 liter, 2 kg and 200 gram adhesive packages which deliver adhesive to dispensing valves.

PRODUCT FEATURES

- Can be used to control two dispense valves or one dispense valve and one advancing slide.
- Two independent digital timing channels.
- Delay setting allows positioning of an advancing slide prior to the opening of dispense valve.
- Low level sensor alarm provides warning for adhesive bottle replacement.
- Interface connections for customer's PLC to indicate reservoir low level condition and cycle complete signal.
- Easy-to-use keypad with LCD display screen for entering values.
- Simple menu-driven commands.
- Equipped with a 0 to 7 bar (0-100 psi) pressure regulator.
- Analog pressure gauge.
- Time range is adjustable from 0.01 to 99.99 seconds.
- Can be run in Auto or Manual mode.
- Manual button for purging adhesive from valves.
