Product Description Sheet Manual Cartridge Applicator 300ml.

Part # 1093940

North American Engineering Center

PRODUCT DESCRIPTION

The Loctite® brand Manual Cartridge Applicator is designed for use with sealants and adhesives packaged in 300 ml (10.3 oz.) cartridges. The mechanical advantage of a 26:1 thrust ratio allows for easy application of medium to high viscosity materials. This professional quality, high thrust applicator is made especially for materials that may be difficult to extrude. This industrial grade applicator has a revolving barrel frame that rotates to allow for easy application of materials around corners. The one-piece sintered friction catch plate has extra durability and higher precision when compared to competitor's models that have a two-piece friction plate with plastic inserts.

PRODUCT FEATURES

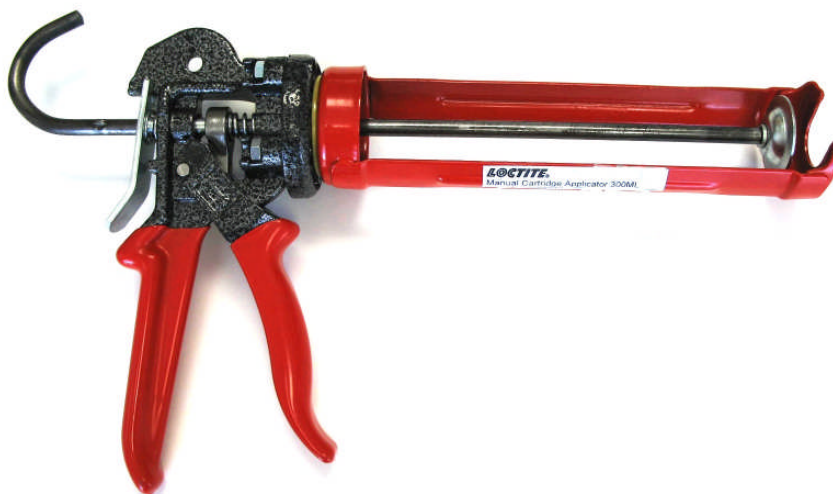

- 26:1 thrust ratio helps prevent hand fatigue
- Extra durable, super smooth, heat-treated piston rod
- Easy thumb activated pressure release
- Built-in Ladder hook
- Comfort grip handle
- Revolving barrel frame
- One-piece sintered friction catch plate

TECHNICAL DETAILS:

- Dimensions:
 - Length: 14.5 inches
 - Width: 2.25 inches
 - Handle Length: 5.0 inches
 - Weight: 2.25 lbs.

FOR USE WITH:

- Henkel construction adhesives
- Caulking products packaged in standard 10 oz caulking tubes.
