

## LOCTITE® EQ RB40 Robots

The LOCTITE® EQ RB40 Robots are designed specifically for precision dispensing of adhesive and sealants onto complex surface configurations. They allow manufactures to repeatedly and reliably dispense patterns of liquid material on a programmed basis, resulting in improved process efficiencies, minimal material waste, and reduced manufacturing costs. Now with improved memory and performance for all your most complex programming needs, these robots excel at delivering the performance required to optimize your dispensing application.

### Product Features:

- Specifically designed for adhesive dispensing
- Repeatability of +/- 0.01mm
- Plug and play with all standard LOCTITE® equipment
- Full line of programming and integration accessories
- Compatible with all previous D-Series robot components and accessories (24V).

### RB40 Part Numbers

IDH	DESCRIPTION
2104801	RB40 200D Benchtop Robot
2104799	RB40 300D Benchtop Robot
2104795	RB40 400D Benchtop Robot
2103369	RB40 500D Benchtop Robot
2112252	RB20 500D Dual Robot
2112253	RB15 200D Gantry Robot

### New Accessories

IDH	NAME	DESCRIPTION
1912406	EQ RB30 Robot Camera	Targeting camera to assist with detailed programming of dispense patterns on small parts
2148218	EQ ACCE D-Series Robot Software	Software for programing of robot via a PC (no teach pendant required) with CAD drawing import feature.
2182205	EQ ACCE D-Series Junction Box 24V	Plug and play junction box for integrating LOCTITE® dispensing and light cure equipment.
